Spin Starts
Record how many wilds persisted from last spin
Decide how many new ones to place based on how many was present using the 2DCHANCETABLE
Keep the persisted ones in limbo moving around the screen on a "layer above" the reels while the reels drop and spin , new wilds land with the reels
After reel 6 lands, move the persisted ones that are in limbo to new spots, but not in a space already occupied by a wild
Award Wins
If another spin remains , drop regular symbols off the screen , persisting the wilds
